

High Deductible Health Plan

Expanded Preventive Drug List

Updated July 2016

Your employer is making an effort to reduce your health care costs by giving you tools to help you stay healthy and productive. Below are the medications your employer has chosen to be included in the High Deductible Health Plan Preventive Drug list described in detail in your benefit plan. These medications help protect against or manage some high risk medical conditions. Taking these medications as directed by your prescriber can help avoid serious health problems. That may mean fewer doctor visits and hospitalizations, reducing your total health care costs.

In the drug list below, generic drugs are shown in lowercase type. Brand name drugs are shown in uppercase type.
